This weapon is a sidegrade\*, available alongside the normal Cavaliere after unlocking it.

It sports weaker super-armor than the base version. I tested it against a Hell Caina and found no difference, but stronger enemies knocked me down in fewer hits with the R.

The benefit of the weapon is a new move: a back-to-forward Swordmaster input that acts as a faster version of Full Throttle.

\*On higher difficulties where damage is higher (or fatal), this becomes a straight upgrade.. "Its instantaneous output has been increased"

Means you get a new move with this DLC.. I can only imagine the madman who thought up this weapon. "Its instantaneous output has been increased"
